IPA Total Orchard

IPA Total Production

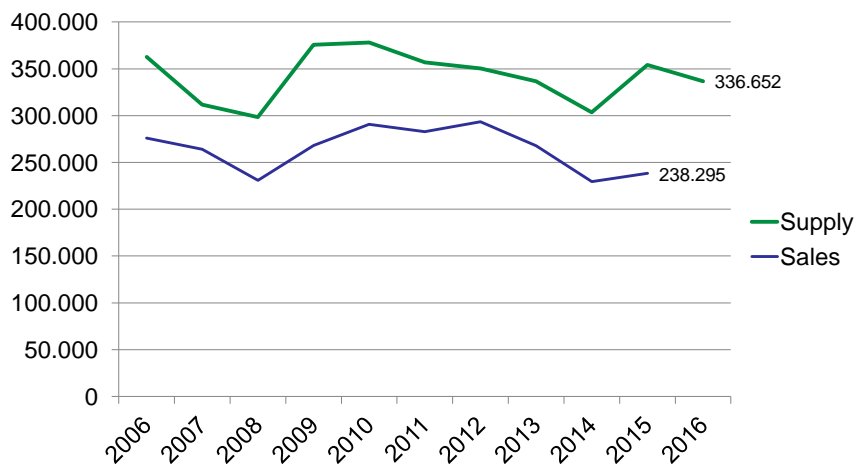

Note: 2021 estimates are a potential crop without any disaster in any country

• 2 . Outlook

Evolution of World Supply

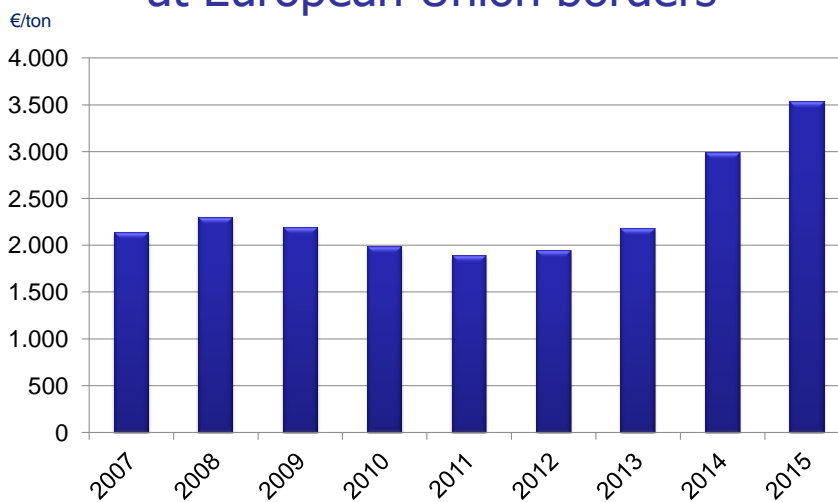

Evolution of World Carry-Over Stocks beginning of marketing year

Note: Supply does not include imports into producing countries

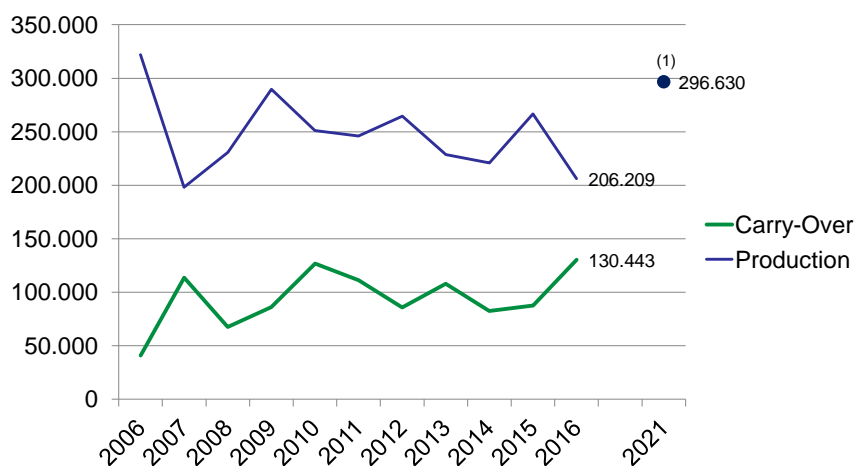

Evolution of Average Prices at European Union borders

Note: Calendar years - EU-in and France to EU prices – Source EUROSTAT

Evolution of World Production

(1) Cumulated World theoretical production without any climatic disaster in any country

Summary

- The world prune orchard is stabilized
- The average level of international prices is still firm, although Brazil and Russia are missing on the market
- Low levels of Brazil and Russia markets cause some stocks in our warehouses
- The outlook is still to stability of average production in the next years
